Letter of Referral,

To Whom It May Concern:

I am please to provide a professional referral for JHB Performance. JHB Performance has provided Moller International with high quality cermet coatings. We have used these coatings in a variety of applications including engines for our Skycar.

Over the last couple years we have done extensive testing with various forms of engine coatings for our rotary engines and have found the JHB Performance cermet coatings to have excellent performance and durability in comparison to these.

In one test engine, JHB cermet coatings were used on one end housing and another brand on the other end housing. The engine accidentally ingested shrapnel during operation causing the engine to fail. Upon disassembly we found the JHB cermet coatings to be unscathed whereas the coating on the other end housing exhibited severe damage.

To date, we are extremely satisfied with the level of service and quality we have seen form JHB Performance and will continue to use their cermet coating services in our rotary engine applications.

Best Regards,

Dr. Paul S. Moller  
President - Moller International

Justin Blumetti  
Project Engineer - Moller International

Quotation for website;

JHB Performance Cermet coatings are currently being used with excellent performance and durability in our Skycar and Freedom Motors rotary engines applications.
